NOTE: Color selections on this chart approximate as closely as possible appearance of color when used on horizontal troweled and/or imprinted concrete. Variations can be expected due to job conditions, cement finishing techniques, use of sealers and slight raw material color drifts. Due to the natural source materials in cement and handcrafted nature of imprinted concrete, variations are acceptable and desirable. See Concretech Technical Bulletin before use.

Because the conditions of use and application of our products are beyond control, **Concretech Decorative Concrete Supply Ltd.** makes no warranty of fitness or merchantability for any particular purpose and expressly disclaims liability for incidental or consequential damages whether based on negligence or warranty. Buyer's sole remedy shall be the refund of color purchase price from point of purchase.

Green Slate
3lb. or 3% BC-12

Strawflower
3lb. or 3% BC-11

Calculations for adding integral color to your mix.

To obtain the best results:

1. Determine the amount of cement in your mix. (Ask your dispatcher)
2. Choose the color from the Concretech color chart.
3. Use the percentage number from the chart for the calculation.
4. Multiply the cement weight by color %, this equals the total weight of color needed

Examples:

Calculating in Metric: You have one (1) meter of concrete with 320kg of cement and you want Strawflower which is 3% of Concretech BC-11.
 $320\text{kg} \times 2.2 \text{ (lbs per kg)} = 704\text{lbs cement}$. $704\text{lbs} \times 3\% = 21\text{lbs of Strawflower BC-11}$.

Calculating in U.S.: You have 5 yards of concrete with 660lbs cement per yard and want Strawflower. $5 \text{ (yards)} \times 660 \text{ (lbs per yard)} = 3300\text{lbs}$.
 $\text{Multiply } 3300 \times 3\% = 99\text{lbs of Concretech BC-11}$.

Note: Cement material defined as the total of portland cement, fly ash, silica fume, lime and other cementitious materials but does not include aggregate or sand.

BREAKTHROUGH IN COLOR TECHNOLOGY

Introducing Concretech's breakthrough in color technology for cementitious materials. Concretech has developed and released its innovative method for coloring concrete. Now you can easily color any type of concrete, from slab on grade to retaining walls to roof tile, just use our proprietary color creation system on the Internet. You can find it at www.concretech.com. This proprietary tool will enable you to create any color you desire and it will produce the exact measurements in units required to obtain the desired color. Our innovations in coloring concrete reduce the inventory you need to carry. If you have any questions on this breakthrough in colored concrete call **1-877-952-0157** from anywhere in North America.

Color Gives Concrete Charisma.
