

CON-SPEC GSR II

DESCRIPTION:

Con-Spec GSR II is an ultra concentrated natural citrus solvent degreaser and deodorizer. GSR II is designed to degrease concrete, asphalt heavy equipment and can even be used around the house. It is a natural product which is completely biodegradable. It is non-corrosive and contains no harmful chlorinated solvents, petroleum distillates, acids or alkalis. Con-Spec GSR II will remove oil, grease, tar even tire marks from most surfaces, while leaving behind a fresh, citrus scent.

USE:

Con-Spec GSR II can be used to remove deposits of grease, oil, and other fluid spills from concrete surfaces. It dissolves most resins, adhesives, rubber tire marks, and a variety of other tough compounds on floors and industrial equipment. Con-Spec GSR II is concentrated but normal use does not require mixing or diluting. This product is considered a non-polluting, biodegradable degreaser; it emits a mild citrus odour while it degreases and cleans.

LIMITATIONS:

This is a concentrated organic degreaser that may harm some plastics, rubber and painted surfaces. Do not use on floor finishes, as it may remove the finish. Always pre-test a surface in an inconspicuous spot if you question the products compatibility. If allowed to dry on a concrete surface a white stain will result that can only be removed by mechanical means. This is a powerful degreaser that may defat skin. Use rubber gloves when handling to avoid chapped skin. Keep container capped when not in use.

TECHNICAL DATA:

Typical Properties

Colour	Clear Liquid
Odour	Light Citrus
Specific Gravity	0.85
Flash point	52°C (TCC)
Freezing Point	-7°C
Boiling Point	161°C

SURFACE PREPARATION:

Sweep floor with a stiff bristled broom to remove surface dirt and other loosely adhering solid contaminants.

DIRECTIONS:

Wear protective gloves. For most applications such as degreasing equipment, oil spill cleanup, removal of tar and asphalt, Con-Spec GSR II is to be used at full strength. For light degreasing the product may be diluted with water.

Oil, Rubber tire marks, Asphalt, Tar, and Mastic:

Apply at full strength. Allow 5 minutes contact time for penetration and heavy cleaning. **Do not allow material to dry on surface.** Scrub with a stiff bristled brush. Thoroughly rinse with high pressure, clean potable water. The higher the water pressure the deeper the cleaning action. Use of high pressure hot water will clean more deeply. All traces of grease and oil should be removed. For unusually deep seated grease and oil stains, a second application may be necessary and allow to remain on surface for 5 minutes. Again do not allow to dry. Flush until water becomes clear (not white).

General-purpose cleaning:

Con-Spec GSR II may be diluted 4 to 6 oz with warm water, depending on severity of the cleaning job. Apply solution to surface, allow 3 to 5 minutes contact time. Rinse thoroughly with water. This product may be used to clean and deodorize dumpsters, garbage receptacles & restrooms. Removes soap scum.

CLEAN UP:

Clean tools with water.

PACKAGING:

1 Litre Containers
4 Litre Containers
20 Litre Containers
205 Litre Containers
